

## Acknowledgment

Yoshiaki Hagiwara <http://www.aiplab.com/>

The author expresses sincere gratitude to Prof. C.A. Mead and Prof. T.C. McGill, for advising my original 1971 work at Caltech on the Ga<sub>2</sub>O<sub>3</sub> – Au Schottky Barrier interface study and characterization, and for guiding my 1974 PhD thesis work on the Charge Transfer Analysis of Buried Channel CCD Image sensors, and also, Yoshiyuki Kawana and Toshio Kato for supporting my original 1978 work at Sony on the P+PNP junction type Pinned Photodiode. They are my dear friends and respectful mentors throughout my private and public life.

# Thank You !
